Technical Data:

Truss components are manufactured from steel conforming to ASTM A-653 or ASTM A-500 and have galvanized coatings in accordance with ASTM A-924 and ASTM A-653, G-90 minimum or G-90 equivalent exterior coating weight (G-60 on CW20). Structural properties of Dynatruss chord and web members are calculated in accordance with the AISI (American Iron and Steel Institute) "Specification for the Design of Cold-Formed Steel Structural Members, August 1986 Edition with December 11, 1989 Addendum." Dynatruss also conforms to AISI Standard for Cold-Formed Steel Framing-Truss Design, December 2004 Edition.
